

THALES

Building a future we can all trust

Cyberattacks are
on the rise, with
a 150% increase
over the past
12 months.

Learn more

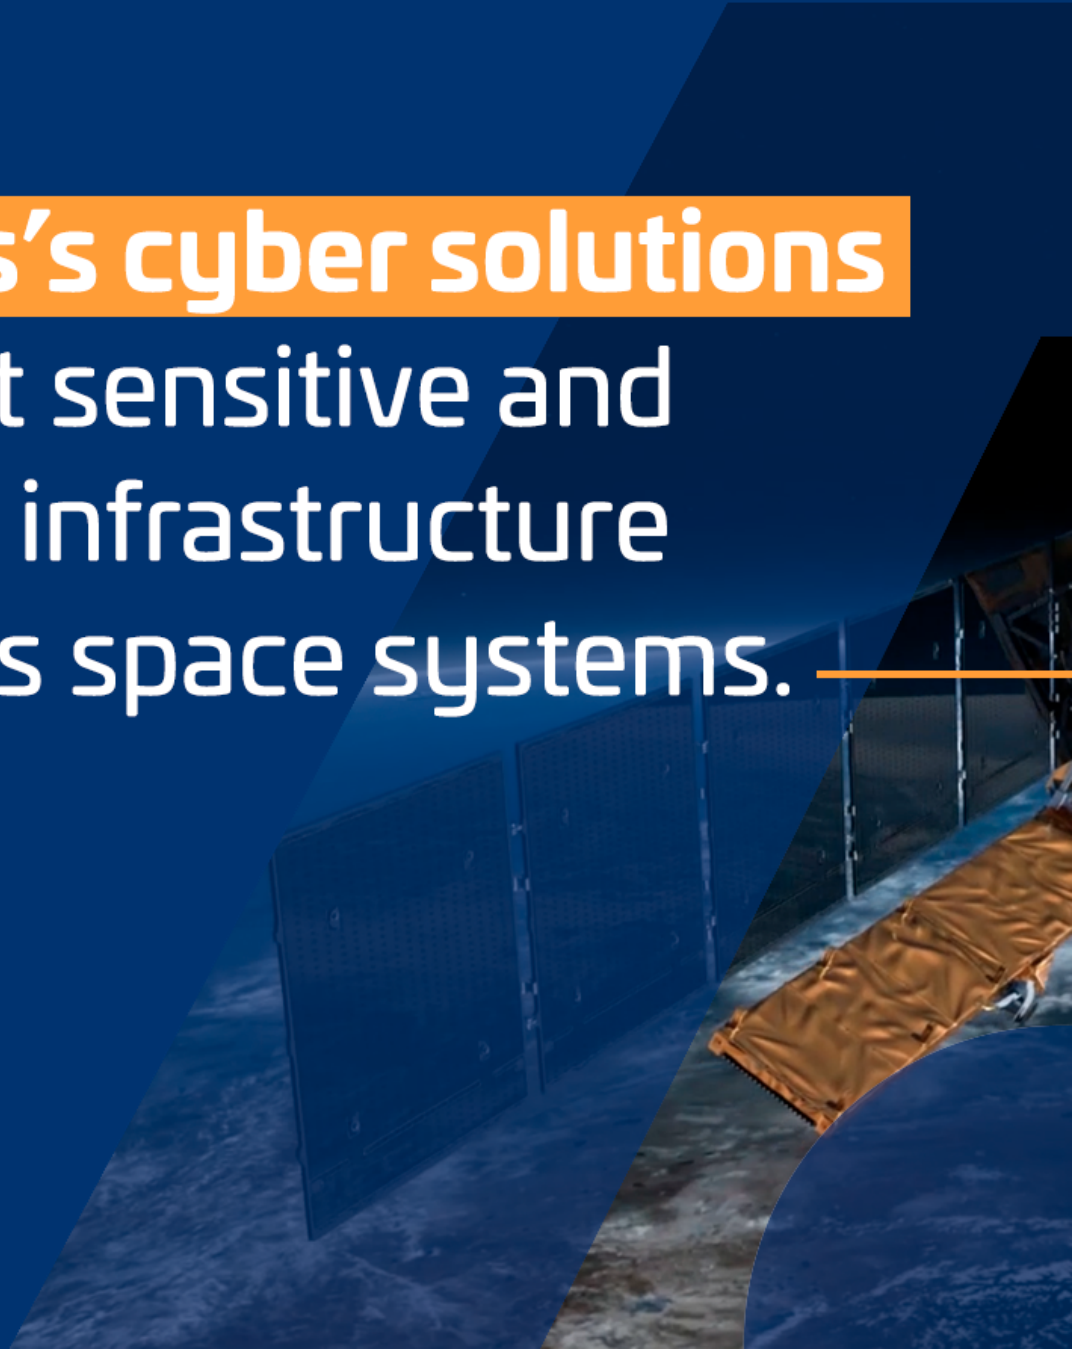

Our cybersecurity solutions protect:

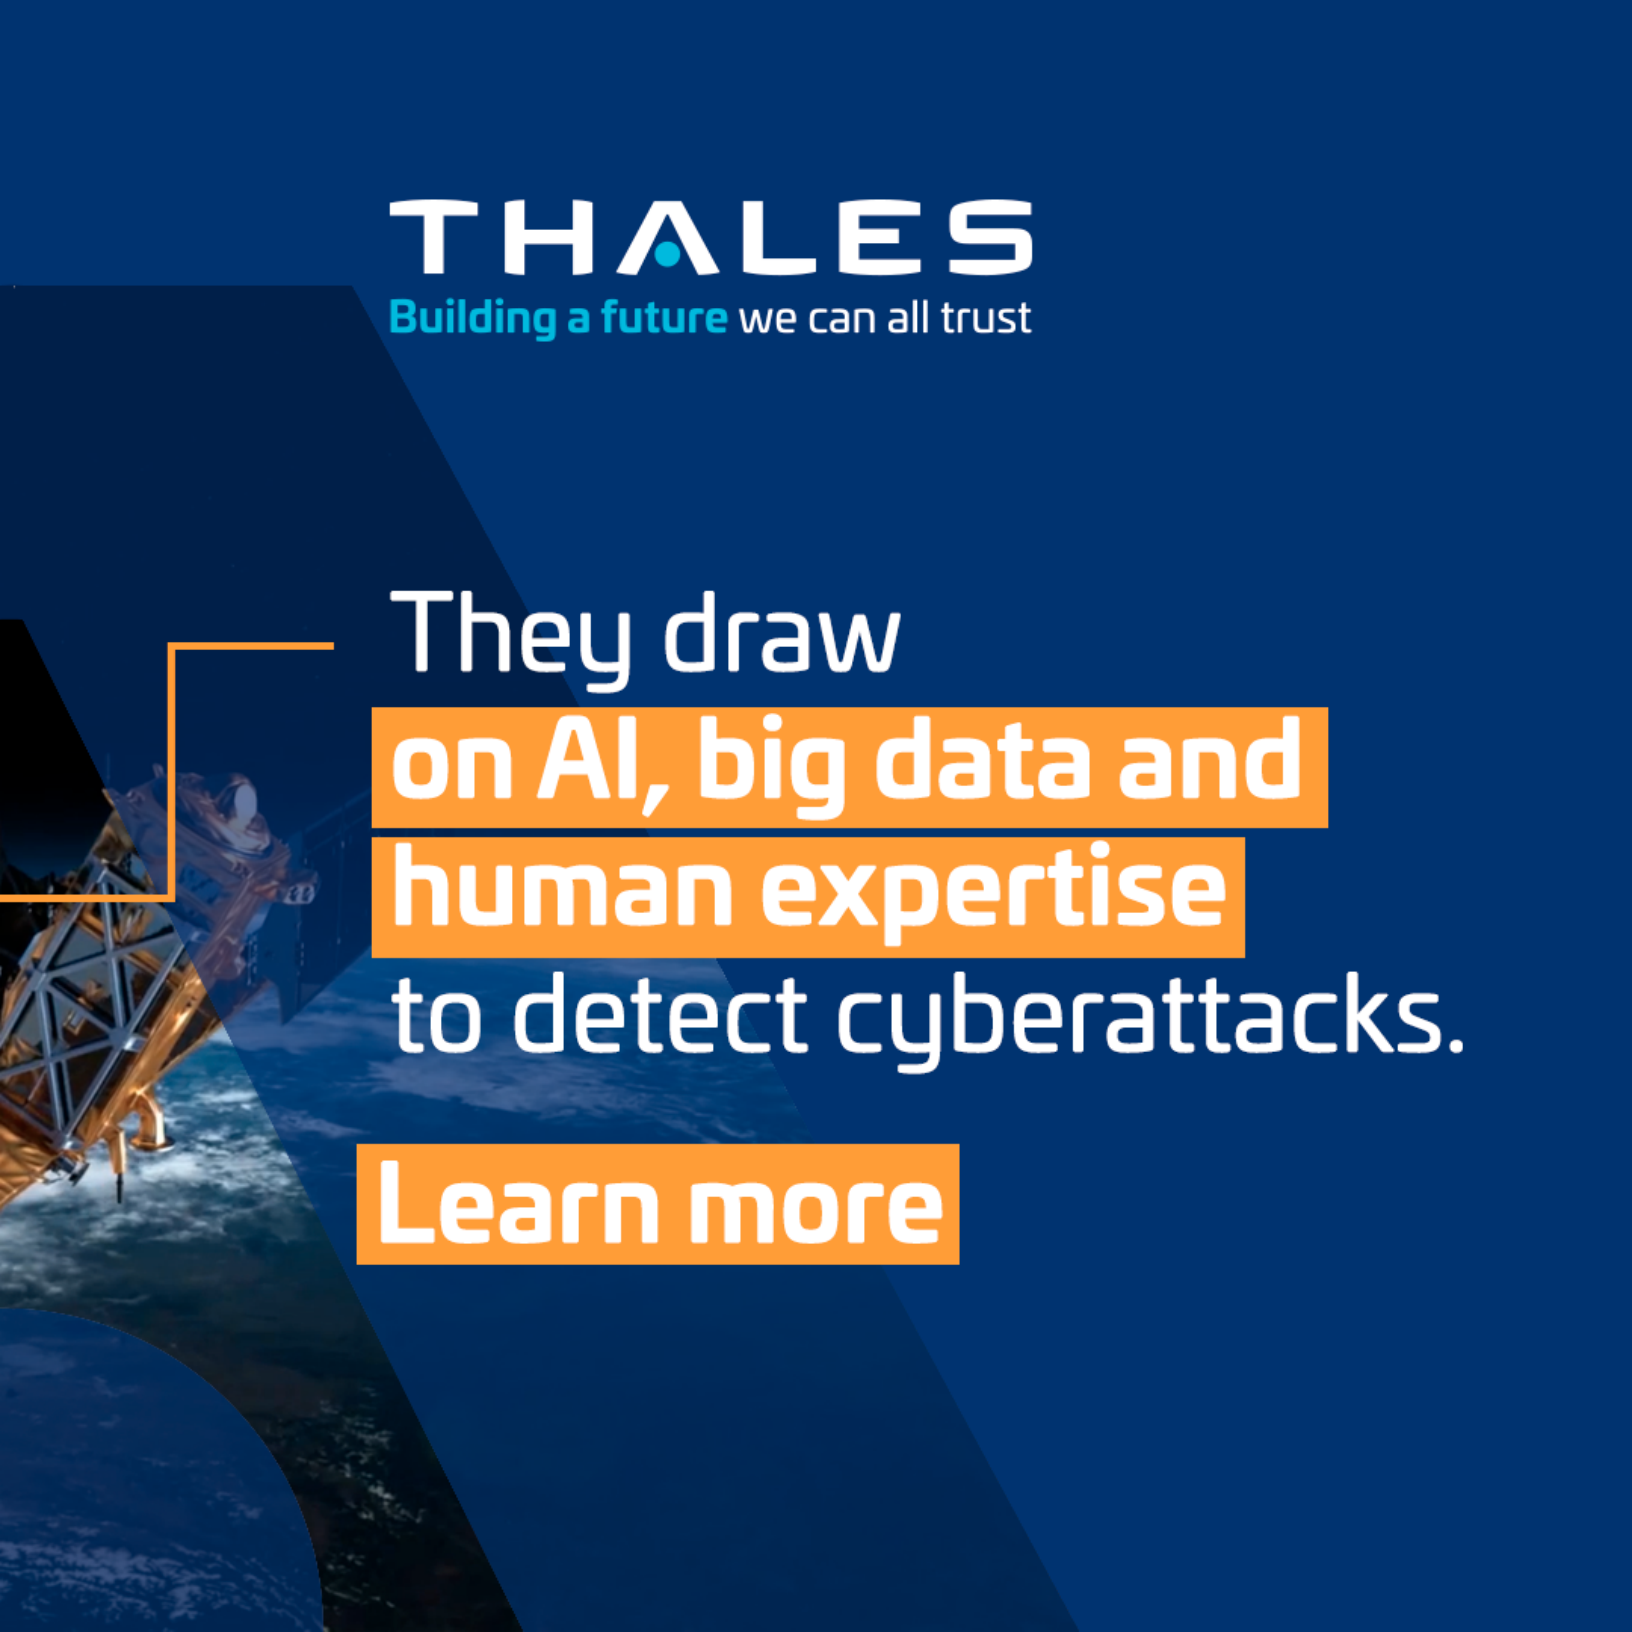

- . your identity
- . your payments
- . cloud-based data
- . connected transportation

and **sensitive and
critical infrastructure**
such as space systems.

Thales's cyber solutions
protect sensitive and
critical infrastructure
such as space systems.

A satellite is shown in the lower-left corner, orbiting Earth. The satellite has a complex structure with various instruments and antennas. The Earth's surface is visible below, showing clouds and landmasses. The background is a deep blue gradient.

THALES

Building a future we can all trust

They draw
on AI, big data and
human expertise
to detect cyberattacks.
