Streamline and Secure License Dongle Management

Digi AnywhereUSB® Plus provides a layer of security and management for your license dongles.
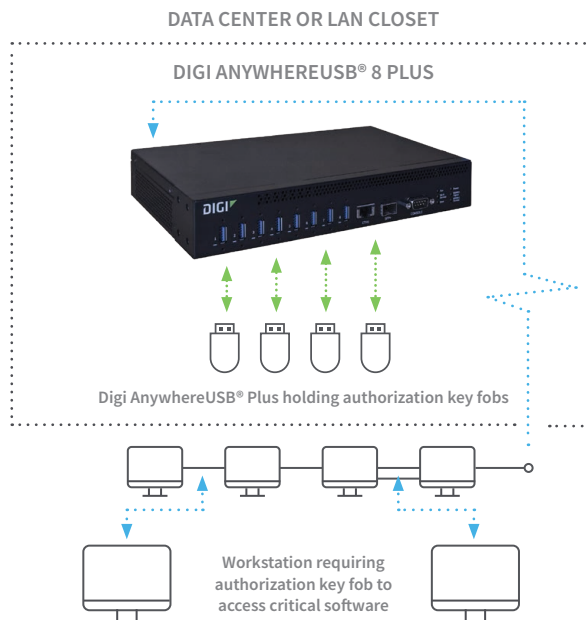

Overview

License dongles provide protection of high-value applications, preventing software from being copied, unlocked or decoded. These small devices can easily be lost or misappropriated. So how do you keep your valuable programs safe?

DATA CENTER OR LAN CLOSET

Key Applications

- Data Centers
- Engineering
- Graphic Design
- Financial
- Industrial Automation
- Retail

Solution

Digi AnywhereUSB® Plus offers secure, flexible and scalable USB 3.1 multiport connectivity for USB devices connected from remote or virtualized hosts. These USB hubs provide secure, robust connectivity between peripheral devices and a PC without the physical proximity constraints typically associated with USB devices. Digi AnywhereUSB® Plus allows license dongles to stay protected in a secure environment while allowing authorized use from different physical or virtual hosts.
