AI in action →

# Moderna's Swift Vaccine with AI

Moderna built an AI-powered platform for mRNA medicine development, helping them speed up the development and delivery of the COVID-19 vaccine.

# Mattel's AI-Powered Toy Ideas

Mattel's designers now use AI image generator DALL-E to help them brainstorm new Hot Wheels by dreaming up car designs based on just word prompts.

# Robo-Bees Out, AI- Powered Pollinators In

No bumblebees needed. Costa Group's Aussie tomato farmers swapped them for AI robots that can pollinate flowers, powered by computer vision.

# AI's on the Factory Floor at P&G

Machines learn when the assembly line needs a fix, make sure diapers are diaper-perfect, and even guide the plant's energy-saving efficiency plans.

# Goldman Sachs Lets AI Write Code

Bankers and AI are in a creative coding duet. The AI writes the code (about 40% of it), and the bankers nod approvingly, keeping the other 60% for a rainy day.

# Choice Hotels' Eco-Friendly AI Buddy

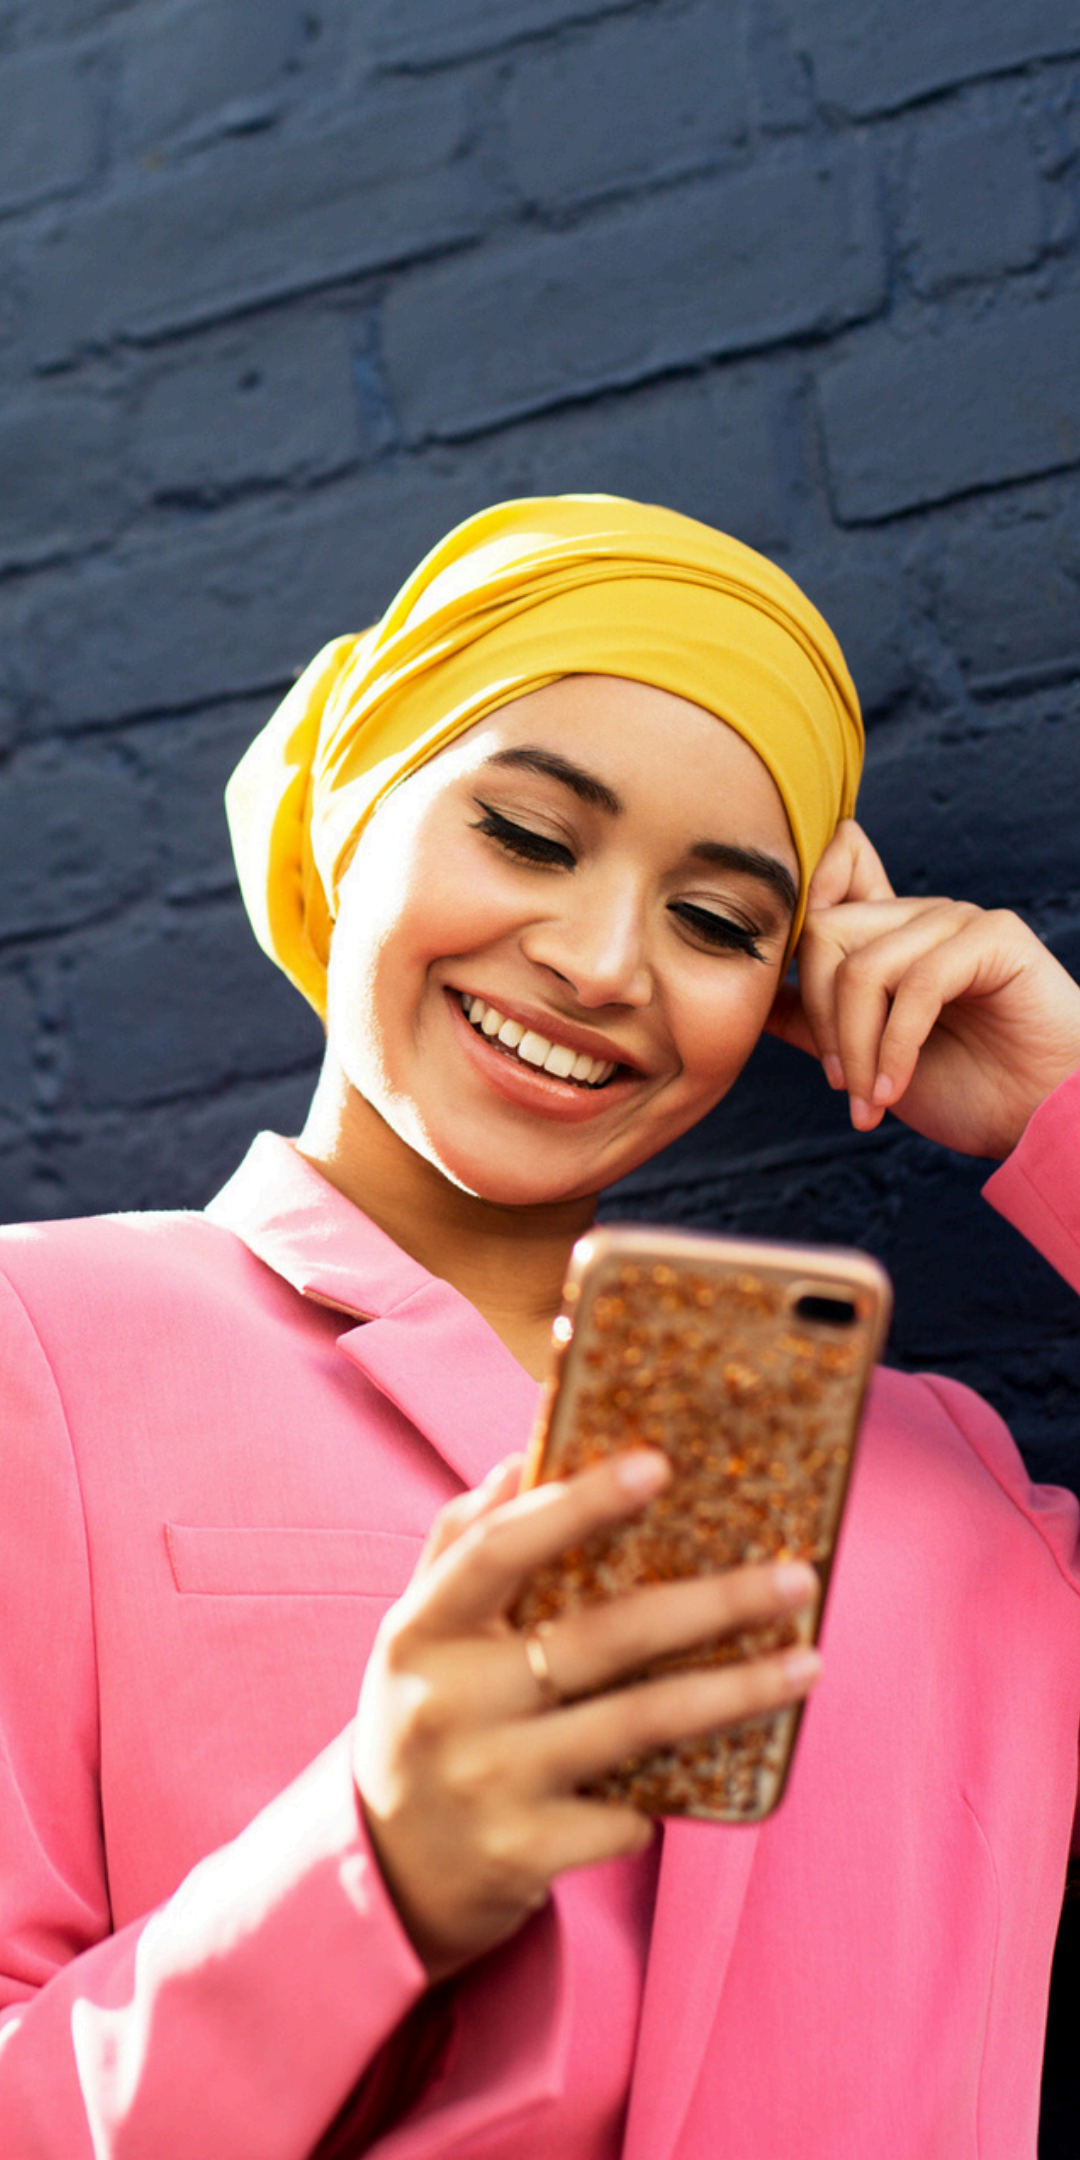

Choice Hotels turned eco-warrior with AI. Their robo-adviser helps hotels slim down on energy waste, so they can proactively manage and reduce it.

# AI Helps Build the UK's High-Speed Railway

The UK's HS2 uses an AI simulator named ALICE. It builds and rebuilds railroad plans in seconds, searching for the fastest track to success.

# Thomson Reuters: 30 Years of AI

Thomson Reuters uses an AI platform to streamline development of AI tools for lawyers, accountants, and news junkies.
