

# 4

## Key Components to Securing AI by Design

# Visibility

You can't see the  
gaps if you can't see  
the ecosystem.

An abstract graphic consisting of a continuous orange line that forms a large, open, curved shape, resembling a stylized '2' or a protective shield. The line starts at the top right, curves down and left, then curves up and right, and finally curves down and left again, ending at the bottom left. The background is a light gray grid.

# Threat Protection

Novel abilities. Novel Risks.  
That's AI.

The background features a light gray grid pattern. Overlaid on this are several large, thin orange outlines of abstract shapes, including a large circle at the top right, a smaller circle below it, and a large, irregular shape at the bottom left that resembles a stylized 'S' or a speech bubble tail.

# Continuous Monitoring

Tracking changes in apps.  
Every. Single. Moment.

The background features a light gray grid. Several orange-outlined geometric shapes are scattered across the page: a large trapezoid in the top left, a smaller trapezoid below it, and several rectangular and L-shaped outlines at the bottom and right edges.

# Use of Controls

The knowledge to be the GenAI app gatekeeper.

# Secure AI by design

And see how to shut down  
risk and fuel adoption.
