

FortiGuard **AI-Powered** Security Services

FortiGuard Labs
Threat Research

WEB SECURITY

FortiGuard web security is optimized to **monitor and protect data and applications against web-based attack tactics** while assisting you with meeting compliance requirements.

CONTENT SECURITY

Our content security solution is optimized to **monitor and protect against file-based attack tactics** while assisting with meeting compliance.

DEVICE SECURITY

Optimized to **monitor and protect**
against device and vulnerability-
based attack tactics while assisting
you with meeting compliance.

APPLICATION SECURITY

This suite of advanced security technologies **enhances application performance with advanced protection, monitoring, and optimization.** It unifies context-aware security across networks, endpoints, and clouds.

SECURITY FOR NOCs/SOCs

Optimized for SOC/NOC teams, we provide faster identification, containment, and response to attacks using AI-powered automation, real-time outbreak detection, threat-hunting tips, and training.
