PROMPT BANK + FORMULA?**

DOWNLOAD THE COMPLETE GUIDE.

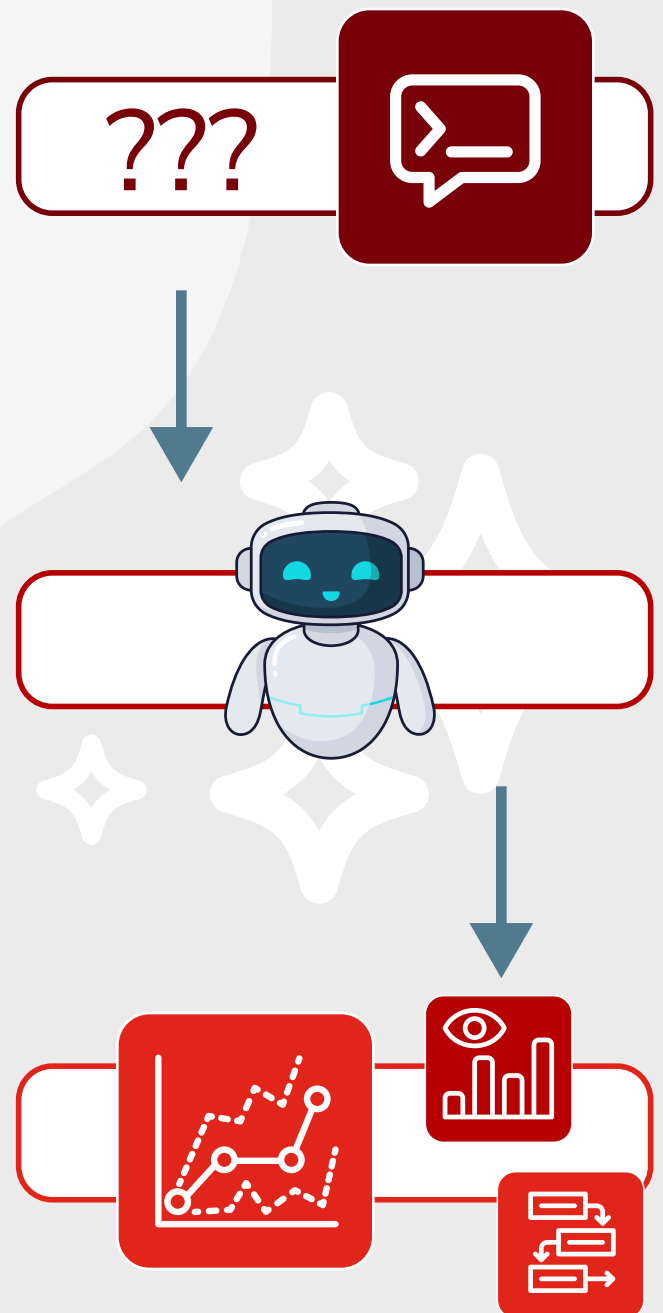

You Can't Get **Good Answers** Without **Great Questions**

Generative AI is only as powerful as the prompts you feed it.

When done well, prompts can:

- Automate routine tasks
- Unlock deep strategic insights
- Align your roadmap with customer and business needs

Planview Copilot helps you act on data faster—without jumping between dashboards or waiting on reports.

Prompt Like a Pro:

A Sneak Peek

Here are just a few prompts PMs are using to drive impact with Planview Copilot:

As a product manager, summarize key blockers across all in-flight initiatives.

Analyze customer feedback and surface the top 5 recurring themes from Q2.

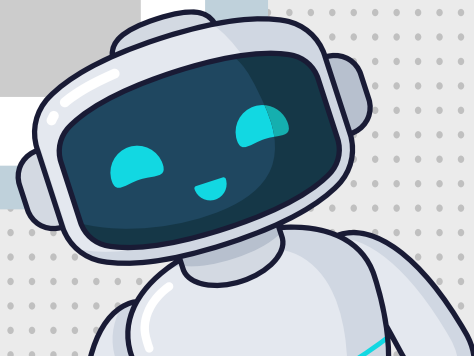

Evaluate which projects in the roadmap exceed capacity for the next 30 days.

Identify any technical dependencies that may delay product launch this quarter.

List initiatives tagged as strategic that are not aligned to any OKRs.

Build Your Own Prompts with This Simple Formula

Use this structure to create custom prompts tailored to your product goals:

“As a [**role**], [**action verb**] [**data set**] to [**desired outcome**].”

Examples:

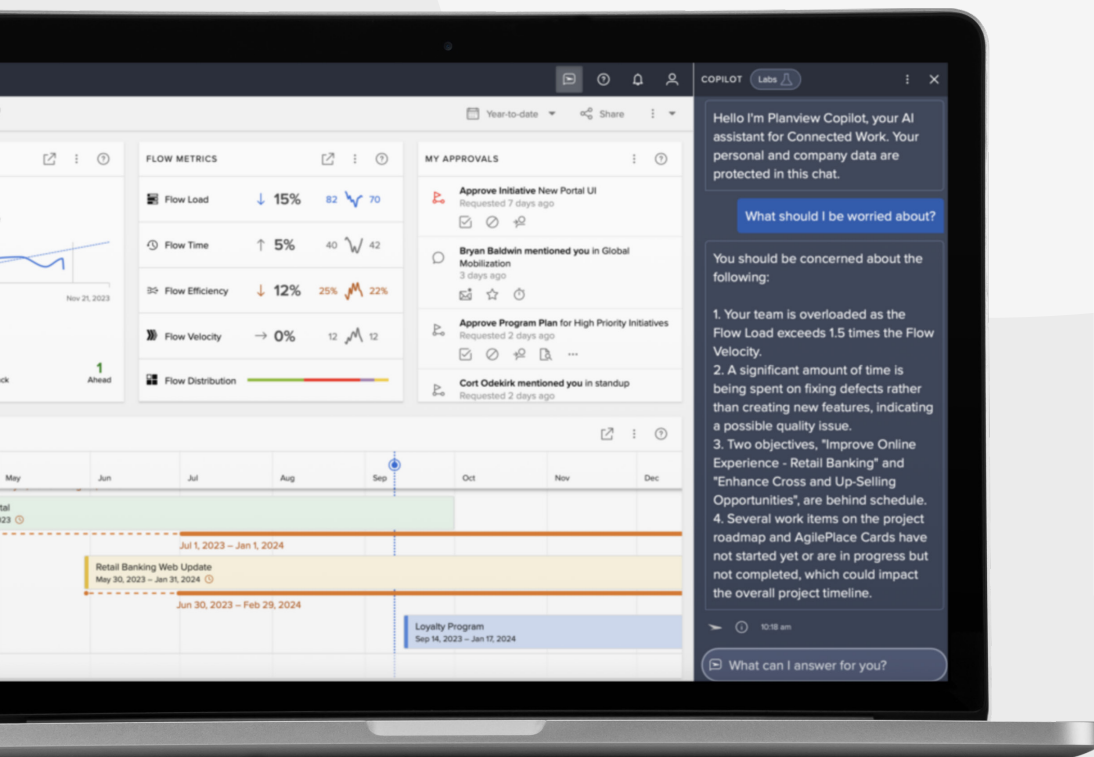

“As a **portfolio manager**, **analyze project risk scoring** to **identify misaligned investments**.”

“As a **head of R&D**, **summarize trends in resource utilization** to **prepare for Q4 hiring decisions**.”

25 Prompts. 1 AI Assistant. Infinite Possibilities.
